A.2 Questions About This Handbook

1. Welcome to YEAB Technologies

1.1 Our Story

YEAB Technologies was founded in 2016 in Austin, Texas, by three engineers who had previously worked together building payments infrastructure. The company started with a single product, YEAB Ledger, a reconciliation tool for mid-market finance teams. Today, YEAB Technologies employs 512 people across four offices: Austin (headquarters), Toronto, Lisbon, and Bengaluru, and serves over 3,400 business customers worldwide.

The name YEAB is derived from an early internal acronym, "Your Enterprise, Automated and Balanced," which reflected the founders' original mission to remove manual reconciliation work from finance teams. While the company has since expanded well beyond reconciliation software, the name and the underlying philosophy of automating tedious, error-prone work have stayed central to everything YEAB builds.

1.2 Mission and Values

Our mission is to help operations and finance teams spend less time on manual, repetitive work and more time on decisions that matter. We believe software should quietly handle the tedious 80% of a job so people can focus on the interesting 20%.

YEAB Technologies operates according to four core values:

- **Default to transparency.** Salary bands, company OKRs, board meeting summaries, and post-incident reviews are visible to all employees unless there is a specific legal or confidentiality reason not to share them.
- **Ship, then improve.** We favor releasing a working version of a feature and iterating based on real usage over long, unreleased development cycles.
- **Disagree, then commit.** Employees are expected to voice disagreement openly during decision-making, but once a decision is made, to support it fully regardless of their original position.
- **Customers are not tickets.** Every employee, regardless of role, is expected to spend time understanding how customers actually use YEAB products, including shadowing support calls at least once per quarter.

1.3 Company Structure

YEAB Technologies is organized into five departments: Engineering, Product, Sales, Customer Success, and G&A; (General & Administrative, covering Finance, People, and Legal). As of the most recent headcount report, Engineering is the largest department at 187 employees, followed by Customer Success at 96, Sales at 88, Product at 41, and G&A; at 34, with the remainder in Executive and cross-functional roles.

The company is led by the Executive Leadership Team (ELT), consisting of the CEO, CTO, CFO, VP of Product, VP of Sales, and VP of People. The ELT meets weekly and publishes a summary of key decisions to the entire company every Friday via the #company-updates Slack channel.

2. Onboarding

2.1 Before Your First Day

Approximately one week before your start date, your recruiter will send a welcome email containing your YEAB email address, a laptop shipping confirmation (for remote employees) or a desk assignment (for office-based employees), and a link to the New Hire Portal. You should complete the I-9 or equivalent employment eligibility verification, direct deposit setup, and benefits enrollment forms in the New Hire Portal before your first day wherever possible, though you have until day 30 to finalize benefits elections.

New hires are shipped a standard equipment kit consisting of a laptop (MacBook Pro 14-inch or a comparable Windows/Linux device on request), a monitor, a keyboard, a mouse, and a headset. Equipment typically arrives 3-5 business days before your start date for remote employees.

2.2 Your First Week

Every new hire is paired with an onboarding buddy, an employee outside their direct team who volunteers to answer informal questions during the first 90 days. Your manager will introduce you to your buddy during your first day.

The first week follows a structured schedule:

- Day 1: IT setup, account provisioning, and a welcome session with People Operations covering benefits, payroll, and company policies.
- Day 2: Department-specific orientation and introduction to your immediate team.
- Day 3: "YEAB 101" session, a two-hour walkthrough of the product suite, company history, and customer base, run by a member of the Product team.
- Day 4-5: Role-specific onboarding tasks assigned by your manager, typically including your first small project or ticket.

New engineering hires are expected to ship their first pull request to production within their first two weeks, a practice the Engineering team refers to as the "two-week ship." This is intentionally a small, low-risk change; its purpose is to get new hires comfortable with the deployment pipeline early.

2.3 30-60-90 Day Check-ins

Managers are required to hold structured check-in conversations with new hires at 30, 60, and 90 days. The 30-day check-in focuses on whether the new hire has the tools and access they need. The 60-day check-in reviews progress against onboarding goals set in week one. The 90-day check-in is a more formal review and marks the end of the introductory period; HR requires managers to submit a short written summary of this conversation to People Operations.

3. Code of Conduct

3.1 Professional Conduct

All employees are expected to treat colleagues, customers, and partners with respect and professionalism. YEAB Technologies has zero tolerance for harassment, discrimination, or retaliation of any kind, whether based on race, color, religion, sex, sexual orientation, gender identity, national origin, age, disability, veteran status, or any other characteristic protected by applicable law.

Employees who experience or witness conduct that violates this policy should report it to their manager, any member of the People team, or through the confidential ethics hotline described in Section 3.4. Reports made in good faith will not result in retaliation against the reporting employee, even if an investigation does not substantiate the complaint.

3.2 Conflicts of Interest

Employees must disclose any outside business activity, board membership, or financial interest that could reasonably be seen to conflict with YEAB's interests. This includes, but is not limited to, working for or advising a competitor, having a significant financial stake in a customer or vendor, or hiring or managing a family member. Disclosures should be submitted to your manager and the Legal team via the Conflict of Interest form in the New Hire Portal or, for existing employees, in the People system.

3.3 Gifts and Entertainment

Employees may accept or give business gifts of nominal value (under \$75 USD) in the ordinary course of business, such as a meal during a customer visit. Gifts of cash or cash equivalents are never permitted in either direction. Any gift or entertainment offer exceeding \$75 USD must be disclosed to your manager, who will determine whether it may be accepted.

3.4 Reporting Concerns: The Ethics Hotline

YEAB Technologies maintains a confidential, third-party-operated ethics hotline at ethics.yeabtech.com, available 24/7 in English and Portuguese. Reports can be submitted anonymously. All reports are reviewed by the Legal and People teams within three business days, and substantiated reports involving a member of the Executive Leadership Team are escalated directly to the Board Audit Committee.

4. Leave and Time Off

4.1 Paid Time Off (PTO)

Full-time employees accrue paid time off at a rate of 1.75 days per month worked, equivalent to 21 days per year, during their first three years of employment. Starting in year four, the accrual rate increases to 2.1 days per month (25 days per year). PTO accrues from an employee's start date and can be used as it accrues; there is no waiting period.

Employees may carry over up to 5 unused PTO days into the following calendar year. Any unused balance beyond 5 days is forfeited on December 31st, except where prohibited by local law (for example, in jurisdictions that require full carryover, such as several Canadian provinces).

PTO requests should be submitted through the People system at least 5 business days in advance for planned absences. Requests are approved by your direct manager and are not capped in duration, though managers may ask employees to coordinate timing with team workload during particularly busy periods.

4.2 Sick Leave

Sick leave is separate from PTO. Employees receive 10 paid sick days per calendar year, which do not carry over and reset each January 1st. Sick leave may be used for the employee's own illness, medical appointments, or to care for an immediate family member. No documentation is required for absences of two consecutive days or fewer; a doctor's note may be requested for absences of three or more consecutive days.

4.3 Parental Leave

YEAB Technologies offers 16 weeks of fully paid parental leave to any employee who becomes a parent through birth, adoption, or fostering, regardless of gender or which parent is designated as primary caregiver. Employees become eligible for parental leave after 90 days of continuous employment. Leave must generally be taken within 12 months of the qualifying event and may be split into two blocks with manager approval.

Birthing parents are additionally eligible for medical leave associated with childbirth recovery, coordinated with YEAB's short-term disability benefit and taken in addition to the 16 weeks of parental leave.

4.4 Bereavement and Jury Duty

Employees receive up to 10 paid bereavement days for the death of an immediate family member (spouse, child, parent, or sibling) and up to 3 paid days for the death of an extended family member. YEAB Technologies provides full pay during jury duty for up to 10 business days; employees summoned for longer jury service should contact People Operations to discuss options.

4.5 Company Holidays

YEAB Technologies observes 11 paid company holidays per year in the United States and Canada, and a locally adjusted holiday calendar for the Lisbon and Bengaluru offices published each December for the following year. In addition to fixed holidays, every employee receives 2 floating holidays per year to use for holidays or observances not on the standard calendar.

5. IT and Information Security Policy

5.1 Account and Password Requirements

All YEAB accounts must use a password of at least 14 characters and must have multi-factor authentication (MFA) enabled using an authenticator app; SMS-based MFA is not permitted for access to production systems as of the policy update in 2024. Passwords must be rotated immediately if there is any suspicion of compromise, but routine forced rotation is not required, consistent with current NIST guidance.

Password managers are provided to all employees at no cost (YEAB uses 1Password company-wide) and its use is mandatory for storing any work-related credentials. Sharing passwords between employees, even temporarily, is prohibited; shared access to a system should instead be requested through the IT access request form.

5.2 Device Policy

Company-issued laptops must have full-disk encryption enabled (FileVault on macOS, BitLocker on Windows) and must run the YEAB-managed endpoint security agent at all times. Employees may not disable the endpoint agent or install unapproved software that requires administrator privileges without IT approval.

Personal devices ("BYOD") may be used to access email and calendar only, and must be enrolled in YEAB's mobile device management (MDM) system, which enforces a passcode and allows YEAB to remotely wipe company data (but not personal data) from the device if it is lost, stolen, or the employee separates from the company.

5.3 Data Classification and Handling

YEAB classifies data into three tiers: Public, Internal, and Restricted. Restricted data includes customer financial data, personally identifiable information (PII), and any data subject to YEAB's SOC 2 Type II commitments. Restricted data may only be stored in approved systems (the production database, the data warehouse, and specifically provisioned analytics environments) and may never be exported to a personal device, personal cloud storage, or a local spreadsheet.

Employees who need to work with a sample of production data for debugging must use the anonymized staging dataset, which is regenerated nightly from production with all PII masked. Direct queries against the production database by engineers require a documented business justification and are logged and reviewed weekly by the Security team.

5.4 Incident Reporting

Any suspected security incident, including a lost device, a phishing email that was clicked, or unusual account activity, must be reported to security@yeabtech.com or in the #security-incidents Slack channel immediately, and no later than one hour after discovery. There is no penalty for reporting a mistake, such as clicking a phishing link, promptly; the policy explicitly protects employees who self-report to

encourage fast disclosure over concealment.

The Security team maintains a target of acknowledging reported incidents within 30 minutes during business hours and within 2 hours outside business hours, using the on-call rotation described in Section 6.4.

6. Engineering Guidelines

6.1 Development Workflow

YEAB Engineering uses a trunk-based development model. All feature work happens on short-lived branches (targeted to merge within 2-3 days) that branch from and merge back into main. Long-lived feature branches are discouraged because they tend to accumulate merge conflicts and delay feedback.

Every pull request requires at least one approval from another engineer before merging, and pull requests touching billing, authentication, or payments code require two approvals, at least one from a senior engineer or above. All pull requests must pass the automated CI pipeline, which runs unit tests, integration tests, and a static analysis security scan, before they can be merged.

6.2 Code Review Standards

Reviewers are expected to respond to a review request within one business day. Reviews should focus on correctness, security, and maintainability rather than pure style preference, since style is enforced automatically by linters and formatters (Prettier and ESLint for TypeScript, Black and Ruff for Python) as part of a pre-commit hook.

YEAB engineers are encouraged to leave a mix of blocking comments (prefixed with "Blocking:") and non-blocking suggestions (prefixed with "Nit:") so authors can distinguish must-fix issues from optional improvements.

6.3 Deployment Process

Deployments to production happen automatically after a pull request merges to main, via the CI/CD pipeline, with no manual deploy step required for most services. Deployments are rolled out gradually using a canary strategy: a new version first receives 5% of production traffic for 15 minutes, and is automatically rolled back if error rates or latency exceed defined thresholds during that window, before being promoted to 100%.

Deploys are blocked automatically outside of a defined deploy window (Monday through Thursday, 8am-4pm in the deploying engineer's local time zone) unless an engineer explicitly overrides the freeze with sign-off from an engineering manager. This policy, known internally as "no risky Friday deploys," exists to ensure adequate staffing is available to respond if something breaks.

6.4 On-Call and Incident Response

Each engineering team maintains a weekly on-call rotation, tracked in PagerDuty. On-call engineers are expected to acknowledge a page within 10 minutes and begin investigating within 20 minutes. Employees on-call receive an on-call stipend of \$150 per week in addition to their regular compensation.

Incidents are classified into four severities. A Sev1 incident (complete outage or data loss affecting all customers) requires the on-call engineer to declare an incident, page the incident commander on-call rotation, and open a dedicated incident channel within 5 minutes of detection. Every Sev1 and Sev2

incident requires a blameless postmortem published within 5 business days of resolution.

7. Expense and Reimbursement Policy

7.1 General Principles

YEAB Technologies reimburses reasonable, ordinary, and necessary business expenses. Employees should exercise the same judgment spending company money as they would spending their own. Expenses should be submitted through the Expensify platform within 30 days of being incurred; expenses submitted more than 90 days after being incurred will not be reimbursed except in unusual circumstances approved by Finance.

7.2 Travel

Airfare should be booked in economy class for flights under 6 hours and may be booked in premium economy for flights over 6 hours. Business class requires VP-level approval and is generally reserved for international flights over 9 hours. Hotel bookings should not exceed \$275 per night in major metro areas (New York, San Francisco, London) or \$200 per night elsewhere, without prior approval.

Ground transportation, including rideshare and taxis, is reimbursable for business travel. Employees are encouraged to use public transit or rideshare over rental cars where practical, both for cost and sustainability reasons.

7.3 Meals

Meal expenses while traveling for business are reimbursed up to \$75 per day, itemized as up to \$15 for breakfast, \$25 for lunch, and \$35 for dinner. Client meals are reimbursed separately and are not subject to the daily per-person cap, but must include the names of all attendees and the business purpose in the expense note.

7.4 Home Office and Remote Work Stipend

Fully remote employees receive an annual home office stipend of \$500, which can be used for items such as a desk, chair, or monitor arm, and a separate monthly stipend of \$50 to offset internet and phone costs. The annual stipend does not roll over if unused.

8. Performance and Career Growth

8.1 Performance Review Cycle

YEAB Technologies runs formal performance reviews twice per year, in June and December. The review process combines self-assessment, manager assessment, and peer feedback from 2-4 colleagues selected jointly by the employee and their manager. Reviews are calibrated across each department to ensure consistency in ratings between managers.

In addition to the formal semi-annual cycle, managers are expected to hold informal one-on-one check-ins with each direct report at least every two weeks, covering progress, blockers, and career development independent of the formal review process.

8.2 Ratings and Compensation Impact

Performance is rated on a four-point scale: Below Expectations, Meets Expectations, Exceeds Expectations, and Outstanding. Merit increases and annual bonus multipliers are tied to the December review cycle only; the June cycle is developmental and does not directly affect compensation. Employees rated Below Expectations in two consecutive cycles enter a formal Performance Improvement Plan (PIP), described in Section 8.4.

8.3 Career Ladders and Promotion

Every role at YEAB maps to a published career ladder with defined expectations at each level, available to all employees in the internal wiki. Promotions can be proposed by an employee's manager at any time but are formally approved only during the June and December calibration cycles, to ensure promotions are evaluated consistently across teams rather than on an ad hoc basis.

8.4 Performance Improvement Plans

A Performance Improvement Plan (PIP) is a structured, written plan lasting 30 to 60 days that sets specific, measurable expectations for an employee whose performance has fallen below the bar for their role. PIPs are developed jointly by the manager and a People Business Partner, and the employee receives a formal check-in at least every two weeks during the plan. An employee who meets the goals of a PIP returns to standard performance management; an employee who does not may be separated from the company at the end of the plan period.

9. Compensation and Benefits

9.1 Compensation Philosophy

YEAB Technologies pays at the 65th percentile of the market for each role and location, benchmarked annually using third-party compensation survey data (Radford for technical roles, Option Impact for go-to-market roles). Salary bands for every role and level are published internally and visible to all employees, consistent with the transparency value described in Section 1.2.

9.2 Health Insurance

YEAB Technologies covers 100% of employee premiums and 75% of dependent premiums for the base health, dental, and vision plans in the United States and Canada. Employees may opt into a premium PPO plan at additional cost. Coverage begins on the first day of employment; there is no 30- or 90-day waiting period.

9.3 Retirement Plan

YEAB offers a 401(k) plan in the United States with a company match of 100% on the first 4% of employee contributions, vesting immediately with no cliff. Employees in Canada are enrolled in a comparable Group RRSP with matching contributions on the same terms.

9.4 Equity

Most full-time employees receive an equity grant (RSUs, or stock options for employees in jurisdictions where RSUs are less tax-efficient) as part of their offer. Standard grants vest over 4 years with a 1-year cliff, meaning 25% of the grant vests on the first anniversary of the grant date and the remainder vests monthly over the following 3 years.

9.5 Learning and Development

Every employee has an annual learning and development budget of \$1,500, which can be used for courses, conferences, books, or certifications relevant to their role, and does not require pre-approval below \$500. Amounts above \$500 require manager sign-off. The budget does not roll over into the following year.

10. Remote Work Policy

10.1 Work Location Categories

Employees at YEAB Technologies fall into one of three work location categories: Office-based (expected in an office 4+ days per week), Hybrid (expected in an office 2 days per week, typically Tuesday and Thursday), and Fully Remote (no regular office expectation). An employee's category is set at hire and documented in the offer letter, and changes to category require manager and VP approval.

10.2 Working Hours and Availability

YEAB does not mandate fixed working hours company-wide, but each team defines a set of core collaboration hours, typically a 4-hour window during which employees are expected to be reachable for meetings, published on the team's internal wiki page. Outside of core hours, employees are free to structure their day as they choose, provided deadlines and meeting commitments are met.

10.3 Working from Abroad

Employees may work from a country other than their home country for up to 30 calendar days per year without special approval, provided it does not create tax or legal complications, which is determined by submitting a Working Abroad request through the People system at least 2 weeks in advance. Requests beyond 30 days are evaluated case by case with Legal and Finance, since extended presence in another country can create corporate tax and payroll obligations for YEAB.

10.4 Home Internet and Workspace Requirements

Fully remote employees are required to maintain a minimum internet connection of 25 Mbps download / 5 Mbps upload and a dedicated, distraction-free workspace suitable for video calls. IT will troubleshoot connectivity issues affecting work but is not responsible for the underlying home internet service itself.

11. Diversity, Equity, and Inclusion

11.1 Our Commitment

YEAB Technologies believes that products built for a diverse customer base are best built by a diverse team. We set public annual targets for representation at every level of the company, including senior leadership, and publish progress against those targets in an internal DEI report released each March. The most recent report showed that women make up 38% of the overall workforce and 29% of engineering roles, with a stated goal of reaching 35% in engineering by the end of 2027.

Every hiring panel of three or more interviewers must include at least one member from an underrepresented group where feasible, and every manager who conducts interviews is required to complete YEAB's structured interviewing and unconscious bias training before joining an interview loop.

11.2 Employee Resource Groups

YEAB Technologies supports employee-led Employee Resource Groups (ERGs), including Women@YEAB, Pride@YEAB, BlackTech@YEAB, and ParentsAtYEAB. Each ERG receives an annual budget of \$3,000 for events and programming and is allotted paid time for its elected leads, capped at 3 hours per month, to organize activities. ERGs are open to all employees regardless of personal identity; allies are explicitly welcomed.

11.3 Accessibility and Accommodations

Employees who require a workplace accommodation due to a disability, medical condition, religious practice, or pregnancy should submit a request through the Accommodations form in the People system or by emailing accommodations@yeabtech.com. Requests are handled confidentially by a dedicated People Business Partner and are typically resolved within 10 business days. YEAB Technologies engages in an interactive process with the employee rather than requiring a specific accommodation to be named upfront.

11.4 Pay Equity Reviews

The People Analytics team conducts a pay equity audit twice per year, examining compensation across gender and ethnicity within the same role, level, and location. Any unexplained gap greater than 3% identified in the audit triggers a mandatory off-cycle compensation adjustment, independent of the standard performance review cycle described in Chapter 8.

12. Sales and Customer Success Guidelines

12.1 Sales Process Overview

The YEAB sales process follows five stages: Qualification, Discovery, Technical Evaluation, Proposal, and Close. Deals over \$100,000 in annual contract value require review by a Deal Desk before a proposal is sent to the customer, to ensure pricing, contract terms, and any non-standard commitments are consistent with company policy.

Sales representatives are prohibited from making product commitments (specific feature delivery dates, custom integrations, or SLAs beyond the standard published SLA) without written sign-off from the relevant Product Manager. Verbal commitments made during a sales call that are not confirmed in writing are not binding on YEAB Technologies.

12.2 Discounting Policy

Account Executives may approve discounts of up to 10% off list price without additional approval. Discounts between 10% and 25% require approval from a Sales Director, and discounts above 25% require VP of Sales approval and Deal Desk review. Multi-year contracts may receive an additional prepayment discount of up to 8% for annual upfront payment, stacked on top of any negotiated discount.

12.3 Customer Success and Renewals

Every customer with an annual contract value over \$25,000 is assigned a named Customer Success Manager (CSM). CSMs are expected to conduct a business review at least once per quarter with each assigned account and to flag any account showing usage decline of more than 20% month-over-month as "at risk" in the internal health-scoring system.

Renewal conversations should begin no later than 90 days before contract expiration. Accounts that reach 30 days before expiration without a renewal signed are automatically escalated to the CSM's manager for a joint save-plan review.

12.4 Support Response Time Commitments

YEAB's standard support SLA commits to a first response within 4 business hours for standard-tier customers and 1 business hour for customers on the Enterprise support plan. Sev1 production-impacting issues reported by Enterprise customers receive 24/7 coverage with a 30-minute first response target, supported by the on-call rotation described in Section 6.4.

13. Legal, Privacy, and Compliance

13.1 Anti-Bribery and Anti-Corruption

YEAB Technologies prohibits offering, promising, giving, or authorizing anything of value to a government official to obtain or retain business, consistent with the U.S. Foreign Corrupt Practices Act and the UK Bribery Act, both of which apply to YEAB's global operations regardless of where an individual transaction occurs. This applies to interactions with government-owned or government-affiliated customers, which YEAB serves in several markets.

All third-party sales agents, resellers, and consultants must complete anti-bribery due diligence screening before being engaged, coordinated by the Legal team, and their contracts must include anti-corruption representations.

13.2 Customer Data Privacy

YEAB Technologies acts as a data processor for customer data uploaded into its products and maintains SOC 2 Type II certification, renewed annually, along with GDPR and CCPA compliance programs. Customer data is never used to train YEAB's machine learning models unless a customer has explicitly opted in through a separate data processing addendum.

Data subject access requests (DSARs) received from a customer's end users must be routed to privacy@yeabtech.com and are contractually required to be fulfilled within 30 days under GDPR and within 45 days under CCPA. Engineers should never respond to a DSAR directly; all requests must be handled through the Privacy team's documented process.

13.3 Export Controls and Sanctions

YEAB Technologies complies with U.S. export control regulations (EAR) and sanctions programs administered by the Office of Foreign Assets Control (OFAC). The company does not sell, and its products may not be resold or provided, to individuals or entities in countries subject to comprehensive U.S. sanctions. Sales and Customer Success teams are required to complete annual export control training and must flag any prospective customer headquartered in a sanctioned jurisdiction to Legal before proceeding with a deal.

13.4 Record Retention

Financial records, signed contracts, and board materials are retained for a minimum of 7 years in accordance with applicable corporate and tax law. Customer support tickets are retained for 3 years after case closure. Employees should never independently delete company records that may be relevant to pending or reasonably anticipated litigation; Legal will issue a formal litigation hold notice when applicable, which suspends normal retention schedules for the affected records.

14. Workplace, Facilities, and Health & Safety

14.1 Office Access and Visitors

Office badges are issued during your first day and provide access to your home office as well as any other YEAB office for up to 5 visits per quarter without prior notice, to support cross-office collaboration. Visitors, including candidates, vendors, and personal guests, must be signed in at reception and accompanied by an employee at all times while in non-public areas of the office.

14.2 Health and Safety

Each office maintains a designated Health and Safety Officer, a volunteer role held by an employee in that location, responsible for maintaining the first aid kit, running quarterly fire drills, and serving as the primary contact during a building emergency. Any workplace injury, regardless of severity, must be reported to the Health and Safety Officer and to People Operations within 24 hours using the Incident Report form.

14.3 Substance-Free Workplace

YEAB Technologies prohibits employees from being under the influence of alcohol or illegal drugs while performing work duties. Moderate alcohol consumption is permitted at company-sponsored events such as Friday socials and offsites, but employees are expected to exercise good judgment, and no employee is ever required to consume alcohol at a company event.

14.4 Workplace Violence Prevention

YEAB Technologies has zero tolerance for threats or acts of violence in the workplace, whether in a physical office or during a remote meeting. Any employee who feels unsafe should leave the situation if possible and contact security (in-office) or People Operations and, if there is immediate danger, local emergency services, without needing prior approval from a manager.

15. Offboarding and Separation

15.1 Voluntary Resignation

Employees who choose to resign are asked, though not contractually required outside of specific senior roles, to provide at least 2 weeks of notice to allow for a knowledge transfer period. Upon receiving a resignation, managers should notify People Operations within 24 hours so that offboarding tasks, including equipment return logistics and final pay calculation, can begin promptly.

15.2 Final Pay and Benefits

Final paychecks, including payout of any accrued and unused PTO, are issued according to the departing employee's final work state or province's legal requirements, which range from immediate issuance on the last day (as in several U.S. states) to the next regular payroll date. Health insurance coverage in the United States continues through the last day of the month in which employment ends, after which departing employees are eligible for COBRA continuation coverage.

15.3 Equipment Return and Access Revocation

Departing employees must return all company equipment, including laptops, monitors, and badges, within 10 business days of their last day, using a prepaid shipping label provided by IT for remote employees. System access is revoked automatically at 11:59 PM on the employee's last day, including email, Slack, and all internal tools, as part of an automated offboarding workflow triggered by the People system.

15.4 Exit Interviews

People Operations offers every departing employee a voluntary exit interview, typically conducted within the final week of employment. Feedback from exit interviews is aggregated and shared with department leadership on a quarterly basis in anonymized form, unless the departing employee explicitly consents to attributed feedback being shared.

16. Communication and Meeting Norms

16.1 Slack Etiquette

YEAB Technologies is a Slack-first company, and employees are expected to default to public channels over direct messages for work discussions whenever possible, so that context is discoverable by others later. Employees are not expected to respond to non-urgent Slack messages outside their own working hours; urgent, time-sensitive matters should use a phone call or the on-call paging system instead of Slack.

16.2 Meeting Guidelines

Every meeting invite is expected to include a written agenda; meetings without an agenda may be declined by invitees without penalty. Meetings should default to 25 or 50 minutes rather than 30 or 60, to leave a buffer between back-to-back meetings. Any meeting with more than 8 attendees requires a stated decision or outcome in the invite, since larger groups are considered ineffective for open-ended discussion.

YEAB Technologies observes "No Meeting Wednesdays" company-wide, during which no internal meetings should be scheduled except for customer calls, interviews, or previously agreed exceptions, to protect a block of uninterrupted focus time each week.

16.3 Written Culture and Documentation

Significant decisions, whether made in a meeting or a Slack thread, should be documented in the relevant team's wiki space within 48 hours. YEAB's engineering and product teams use a lightweight RFC (Request for Comments) process for any change expected to take more than two weeks of engineering time, requiring written sign-off from affected stakeholders before implementation begins.

17. Frequently Asked Questions

17.1 Time Off and Leave

Q: Can I take PTO during my first month?

A: Yes. PTO accrues from your start date and there is no waiting period before you can use it, though your balance will only reflect what has accrued so far (1.75 days per month worked).

Q: What happens to unused sick leave at the end of the year?

A: Sick leave does not carry over. All 10 annual sick days reset on January 1st regardless of how many were used the prior year.

Q: Can I use PTO and sick leave on the same day?

A: No, each day off should be logged under the category that best reflects its purpose. If you're out sick, log it as sick leave, not PTO, even if you had a pre-approved PTO day that week; contact People Operations to adjust the record.

Q: Do floating holidays expire?

A: Yes, the 2 floating holidays described in Section 4.5 must be used within the calendar year and do not carry over or pay out.

17.2 Pay and Benefits

Q: When will I receive my first paycheck?

A: YEAB Technologies runs payroll on a semi-monthly basis, on the 15th and last day of each month. If your start date falls after a payroll cutoff, your first paycheck may cover a partial period and arrive on the following payroll date.

Q: Is the 401(k) match immediate?

A: Yes. As described in Section 9.3, the 100% match on the first 4% of contributions vests immediately with no cliff, unlike the equity vesting schedule described in Section 9.4.

Q: Can I change my health insurance elections outside open enrollment?

A: Only if you experience a qualifying life event (marriage, birth or adoption of a child, loss of other coverage), which must be reported to People Operations within 30 days of the event.

17.3 Remote Work and Equipment

Q: Can I expense a second monitor if I already used my \$500 home office stipend?

A: Not through the stipend, since it does not roll over or reset mid-year, but you may submit an equipment request to IT, who maintains a small pool of spare monitors for cases like this.

Q: I'm Hybrid — do my in-office days have to be Tuesday and Thursday?

A: Tuesday and Thursday is the company default, but individual teams may designate different anchor days; check with your manager for your team's specific in-office days.

17.4 Performance and Career

Q: If I'm promoted in June, does it affect my compensation immediately?

A: Yes, promotions approved during either the June or December calibration cycle described in Section 8.3 come with an updated salary band and typically a merit increase, effective the first full pay period after approval, regardless of which cycle it occurs in.

Q: Can I request peer feedback from someone outside my department?

A: Yes. Section 8.1 requires that peer reviewers be selected jointly by you and your manager, and cross-functional partners are explicitly allowed and often encouraged if they can speak to your impact.

Q: What happens if I disagree with my performance rating?

A: You should raise the disagreement with your manager first. If unresolved, you may request a review from your manager's manager and a People Business Partner, though this does not guarantee the rating will change; it ensures your concern is formally documented and reviewed.

17.5 Expenses and Travel

Q: My hotel is \$300 a night in San Francisco — over the \$275 cap. What do I do?

A: Hotel availability sometimes makes the standard cap unrealistic in high-cost cities; request prior approval from your manager before booking, noting the limited availability, per the exception process described in Section 7.2.

Q: Can I combine a business trip with personal vacation days?

A: Yes, this is allowed and common at YEAB, often called "bleisure" travel internally. Only the business-related portion of airfare and lodging is reimbursable; personal-day hotel nights and any change in airfare cost due to the personal extension are the employee's responsibility.

17.6 Engineering and Deploys

Q: Can I deploy on a Friday if it's an urgent bug fix?

A: Yes, with engineering manager sign-off, as described in Section 6.3. The policy blocks routine deploys outside the standard window, not emergency fixes.

Q: Do I need two approvals for a one-line documentation change?

A: No. The two-approval requirement in Section 6.1 applies specifically to changes touching billing, authentication, or payments code; all other changes require the standard single approval.

18. Glossary of Terms

18.1 Common Abbreviations

- **ELT** — Executive Leadership Team, described in Section 1.3.
- **PIP** — Performance Improvement Plan, described in Section 8.4.
- **CSM** — Customer Success Manager, described in Section 12.3.
- **DSAR** — Data Subject Access Request, described in Section 13.2.
- **MDM** — Mobile Device Management, described in Section 5.2.
- **RFC** — Request for Comments, the engineering and product decision-documentation process described in Section 16.3.
- **ERG** — Employee Resource Group, described in Section 11.2.
- **OFAC** — Office of Foreign Assets Control, referenced in Section 13.3 in connection with U.S. sanctions compliance.

19. Common Scenarios Walkthrough

19.1 Scenario: Starting Parental Leave Mid-Sprint

Maria, a backend engineer in the Payments team, is due to give birth in six weeks and is in the middle of a project that is expected to run for another two months. Following the guidance in Section 4.3, Maria notifies her manager and People Operations at least 30 days before her intended leave start date. Her manager works with her to document open work in an RFC-style handoff note (per Section 16.3) and reassigns her portion of the project to a teammate rather than pausing the whole initiative. Maria elects to take her full 16 weeks of parental leave in one continuous block, though Section 4.3 would also have allowed her to split it into two blocks with manager approval, for example returning part-time for a transition period before taking the remainder later in the year.

19.2 Scenario: Responding to a Sev1 Incident

At 2:14 AM, the on-call engineer for the Billing team receives a page indicating elevated error rates on the invoicing service. Within the 10-minute acknowledgment window required by Section 6.4, she acknowledges the page and begins investigating. She determines within 15 minutes that invoices are failing to generate for all customers, which meets the definition of a Sev1 incident under YEAB's four-tier classification. She declares a Sev1, which automatically pages the incident commander on-call rotation and opens a dedicated incident Slack channel, both within the 5-minute target described in Section 6.4. The issue is resolved by 3:40 AM through a rollback of the most recent deploy. Because this was a Sev1, a blameless postmortem is required, and the team publishes it four days later, within the 5-business-day requirement.

19.3 Scenario: A Large Customer Discount Request

An Account Executive is negotiating a three-year deal with a prospective customer worth \$180,000 in annual contract value. The customer is asking for a 30% discount off list price in exchange for signing a three-year term with annual upfront payment. Per Section 12.2, a discount above 25% requires VP of Sales approval and Deal Desk review, and because the deal exceeds \$100,000 in annual contract value, Deal Desk review is required regardless of discount size, per Section 12.1. The Account Executive submits the deal for Deal Desk review, which also confirms that the customer is not headquartered in a sanctioned jurisdiction, satisfying the Section 13.3 export control check before the contract is finalized.

19.4 Scenario: Suspected Phishing Email

An employee in Customer Success receives an email that appears to be from IT asking them to reset their password via an external link. They click the link and enter their credentials before realizing the email looks suspicious. Per Section 5.4, they report the incident immediately in the #security-incidents Slack channel rather than waiting to see if anything bad happens. Because they self-reported within the required one-hour window, no disciplinary action is taken; the Security team resets the employee's credentials, reviews account activity for signs of compromise, and uses the incident as an anonymized example in the next quarterly security awareness training.

19.5 Scenario: A Below Expectations Rating

An employee receives a rating of Below Expectations in the June review cycle. Because this is a developmental cycle, per Section 8.2, it does not directly affect their compensation, but their manager sets clear, written expectations for improvement ahead of the December cycle. If the employee were to also receive Below Expectations in December, this would trigger a formal Performance Improvement Plan under Section 8.4, developed jointly with a People Business Partner, rather than an immediate separation.

20. Appendix B: Regional Policy Variations

B.1 United States

U.S.-based employees participate in the 401(k) plan described in Section 9.3, are covered by the health, dental, and vision plans described in Section 9.2 with coverage beginning on day one, and are eligible for COBRA continuation coverage after separation as described in Section 15.2. Final pay timing follows the specific requirement of the employee's state; for example, California requires final pay on the last day of employment for involuntary terminations, while many other states allow final pay to be issued on the next regular payroll date.

B.2 Canada

Canadian employees participate in a Group RRSP with matching contributions on the same terms as the U.S. 401(k) match described in Section 9.3. PTO carryover rules follow the stricter of YEAB policy or provincial employment standards; several provinces, including Ontario and British Columbia, require that all earned vacation be paid out or carried over, which takes precedence over the standard 5-day carryover cap described in Section 4.1.

B.3 Portugal (Lisbon Office)

Employees in the Lisbon office are covered by Portuguese labor law, which mandates a minimum of 22 working days of annual leave, exceeded by YEAB's standard 21-25 day PTO policy described in Section 4.1 depending on tenure. Portuguese employees also receive a mandatory Christmas subsidy and holiday subsidy, each equivalent to one month's salary, paid in December and before the summer holiday period respectively, in addition to their regular 12 monthly salary payments.

B.4 India (Bengaluru Office)

Employees in the Bengaluru office are enrolled in the Employee Provident Fund (EPF), a mandatory retirement savings scheme, alongside YEAB's supplemental benefits. Health insurance for the Bengaluru office covers the employee plus up to four dependents at no cost to the employee, broader than the standard 75%-of-dependent-premium policy described in Section 9.2 for the U.S. and Canada, to align with common market practice for technology employers in India.

21. Intellectual Property Policy

21.1 Company Ownership of Work Product

Any code, design, documentation, invention, or other work product created by an employee within the scope of their employment, using YEAB resources, or relating to YEAB's actual or anticipated business, belongs to YEAB Technologies. This is documented in the Proprietary Information and Inventions Assignment Agreement signed by every employee on their first day, and applies regardless of whether the work is created during or outside of normal working hours.

21.2 Open Source Contributions

Employees who wish to contribute to open source projects on their own time, unrelated to YEAB's business, may generally do so, but should consult the Open Source Contribution guide on the internal wiki, since some contributions may still require a review to confirm they don't overlap with YEAB's IP. Employees contributing to open source projects as part of their job (for example, maintaining a library YEAB depends on) must have the contribution approved by their engineering manager and use a YEAB-affiliated GitHub identity.

21.3 Patents

YEAB Technologies maintains a patent program and encourages engineers to submit invention disclosures for novel technical work through the Legal team's invention disclosure form. Employees named as inventors on a granted patent receive a one-time bonus of \$2,500 per patent, split evenly among co-inventors if there is more than one.

22. Vendor and Procurement Policy

22.1 Approved Vendor Process

Any new software vendor or service costing more than \$1,000 per year must go through Security and Legal review before a contract is signed, coordinated through the Procurement request form. This review confirms the vendor meets YEAB's minimum security requirements (SOC 2 Type II or equivalent certification) before any customer or employee data can be shared with them.

Departments may use a pre-approved list of vendors, published on the internal wiki and maintained by Procurement, without a new review, provided the specific use case matches what was originally approved.

22.2 Purchasing Authority

Individual contributors may approve purchases up to \$500 without further sign-off. Managers may approve up to \$5,000, Directors up to \$25,000, and VPs up to \$100,000; purchases above \$100,000 require CFO approval regardless of department. All purchases must still go through the vendor review process described in Section 22.1 if the vendor is new.

23. Product Security and Vulnerability Disclosure

23.1 Responsible Disclosure Program

YEAB Technologies maintains a public responsible disclosure program at security.yeabtech.com/disclosure, allowing external researchers to report vulnerabilities in YEAB products. Valid reports are acknowledged within 3 business days, and researchers who responsibly disclose a valid, previously unknown vulnerability are eligible for a bounty ranging from \$100 for low-severity issues to \$10,000 for critical vulnerabilities that could lead to widespread data exposure.

23.2 Internal Vulnerability Management

Vulnerabilities identified internally, whether through automated scanning or manual testing, are tracked with a required remediation timeline based on severity: Critical vulnerabilities must be remediated within 48 hours, High within 7 days, Medium within 30 days, and Low within 90 days. The Security team reviews outstanding vulnerabilities against these SLAs weekly and escalates any that are at risk of breaching their timeline to the relevant engineering manager.

24. Travel Safety and Duty of Care

24.1 Booking Business Travel

All business travel should be booked through YEAB's designated travel platform (Navan) rather than booked independently and expensed, so that the company maintains visibility into employee whereabouts in case of an emergency. Exceptions for independently booked travel require advance approval from your manager and should still be logged in Navan for tracking purposes.

24.2 High-Risk Destination Travel

Travel to a destination flagged as elevated-risk by YEAB's third-party travel risk provider requires additional approval from the VP of the traveling employee's department and a pre-travel safety briefing coordinated by People Operations. Employees traveling to any elevated-risk destination are enrolled automatically in 24/7 emergency travel assistance coverage through YEAB's travel insurance provider.

25. Marketing, Branding, and Public Communications

25.1 Speaking on Behalf of the Company

Only designated spokespeople, generally members of the Marketing and Executive teams, are authorized to speak to press or make public statements on behalf of YEAB Technologies. Employees contacted by a journalist or industry analyst should route the request to press@yeabtech.com rather than responding directly, even if the request seems informal or low-stakes.

25.2 Social Media Guidelines

Employees are welcome to identify as working at YEAB Technologies on personal social media and to share publicly available company content, but should not share unreleased product details, confidential customer information, or financial results ahead of any public disclosure. When discussing YEAB in a personal capacity, employees are encouraged, though not required, to include a brief disclaimer that views expressed are their own.

25.3 Use of the YEAB Brand

The YEAB Technologies logo, product names, and brand assets may not be used in third-party materials, including personal projects, conference talks, or job-seeking materials, without approval from the Marketing team via the Brand Asset Request form, to ensure consistent and accurate representation of the company.

26. Internal Tools and Systems Directory

26.1 Core Systems

- **People system (Rippling):** System of record for PTO requests, benefits enrollment, and personal information updates, referenced throughout Chapters 2, 4, and 9.
- **Expensify:** Expense submission and reimbursement platform, referenced in Section 7.1.
- **1Password:** Company-mandated password manager, referenced in Section 5.1.
- **PagerDuty:** On-call scheduling and incident paging system, referenced in Section 6.4.
- **Navan:** Business travel booking platform, referenced in Section 24.1.
- **Rippling MDM:** Mobile device management for personal devices accessing email and calendar, referenced in Section 5.2.
- **Confluence (internal wiki):** Home for career ladders (Section 8.3), team on-call schedules, and RFC documents (Section 16.3).

26.2 Getting Access

Standard access to the tools listed in Section 26.1 is provisioned automatically as part of the new hire IT setup described in Section 2.2, based on your department and role. Access to a non-standard tool can be requested through the IT access request form in Confluence; most requests are approved or denied within one business day by the relevant system owner.

27. Environmental and Sustainability Commitment

27.1 Carbon Neutral Operations

YEAB Technologies has committed to carbon-neutral operations for its direct emissions (offices and business travel) since 2023, achieved through a combination of renewable energy purchases for its offices and verified carbon offset credits for air travel, purchased automatically for every flight booked through Navan.

27.2 Office Sustainability Practices

All YEAB offices use compostable or reusable food service ware, and the Austin headquarters operates on 100% renewable electricity through a green power purchase agreement. Employees are encouraged, though not required, to choose rail or ground transportation over short-haul flights under 300 miles where a reasonable alternative exists.

28. Workplace Investigations Process

28.1 How a Complaint Is Investigated

When a complaint is raised under the Code of Conduct described in Chapter 3, whether through a manager, the People team, or the ethics hotline, it is assigned to a trained investigator, typically a People Business Partner not connected to either party. The investigator interviews the complainant, the respondent, and any relevant witnesses, and reviews any relevant documentation such as messages or emails.

Investigations are targeted for completion within 30 calendar days, though complex cases involving multiple witnesses or external legal counsel may take longer. Both the complainant and respondent are informed of the outcome at a high level (for example, whether the complaint was substantiated) but specific disciplinary action taken against another employee is generally not disclosed, to protect the privacy of all parties.

28.2 Possible Outcomes

Substantiated complaints can result in outcomes ranging from coaching and a documented warning to termination, depending on severity, whether it is a repeat issue, and the employee's role. Retaliation against a complainant or witness is treated as a separate, serious violation of the Code of Conduct and is investigated on its own, independent of the outcome of the original complaint.

29. Manager Expectations and Leadership Principles

29.1 What YEAB Expects of Managers

Managing people is treated as a distinct skill set at YEAB Technologies, separate from technical or functional seniority. Every new manager, regardless of department, completes a mandatory two-day Manager Foundations training within their first 60 days in the role, covering the performance review process described in Chapter 8, how to run effective one-on-ones, and how to handle a Code of Conduct concern raised by a direct report.

Managers are evaluated in part on team health metrics, including results from YEAB's anonymous quarterly engagement survey and voluntary attrition on their team, in addition to their team's output, as part of their own performance review.

29.2 One-on-Ones

One-on-ones are considered the direct report's meeting, not the manager's; the direct report is encouraged to set the agenda. Managers are expected to keep a private, running document of discussion topics and commitments made during one-on-ones so that follow-up items are not lost between sessions, and to leave space for career development conversations at least once a month, not only status updates.

29.3 Handling Underperformance Early

Managers are expected to address performance concerns as soon as they notice them, through direct, specific, and documented feedback, rather than waiting for the semi-annual review cycle described in Chapter 8. A Below Expectations rating should never be the first time an employee hears that their performance is a concern; People Operations treats review-cycle surprises as a coaching issue for the manager.

30. New Hire Equipment and Software Checklist

30.1 Standard Equipment by Role

Engineering and Product roles receive a MacBook Pro 14-inch with 32GB of RAM by default, or an equivalent Windows or Linux machine on request. Sales, Customer Success, and G&A; roles receive a MacBook Air 13-inch or equivalent. All roles receive a 27-inch external monitor, a wireless keyboard and mouse, and a noise-cancelling headset as described in Section 2.1.

30.2 Standard Software Provisioning

Every new hire's laptop is provisioned automatically with the endpoint security agent described in Section 5.2, 1Password, Slack, the Google Workspace suite, and Zoom. Engineering hires additionally receive access to GitHub, the CI/CD pipeline described in Section 6.3, and a provisioned developer environment with access to the anonymized staging dataset referenced in Section 5.3, typically within their first two days.

30.3 Requesting Additional Software

Requests for software not included in the standard provisioning list should go through the same vendor and procurement process described in Chapter 22 if the tool is not already on the pre-approved vendor list, or through a simple IT ticket if it is already approved for the employee's department.

31. Confidentiality and Non-Disclosure

31.1 Protecting Confidential Information

Confidential information includes unreleased product plans, financial results before public disclosure (where applicable), customer contracts and pricing, and internal strategy documents. Employees agree, as part of the Proprietary Information and Inventions Assignment Agreement referenced in Section 21.1, not to disclose confidential information outside the company, both during employment and after departure, with no expiration date on this obligation.

31.2 Discussing YEAB with Prospective Employers

Employees interviewing elsewhere, whether currently employed at YEAB or after departure, may discuss their own role, responsibilities, and general accomplishments, but should not share specific confidential details such as unreleased roadmap items, exact customer names under NDA, or internal financial metrics, consistent with the confidentiality obligations described in Section 31.1.

32. Antitrust and Fair Competition

32.1 Interacting with Competitors

Employees should never discuss pricing, customer lists, or bidding strategy with an employee of a competing company, even informally at an industry event, as this can constitute illegal collusion under antitrust law regardless of intent. Any such conversation that begins unintentionally should be redirected immediately, and employees are encouraged to report it to Legal so the interaction is documented.

32.2 Competitive Intelligence Gathering

Gathering information about competitors from public sources, such as their published pricing, marketing materials, or public job postings, is permitted and encouraged as part of normal market research. Obtaining competitor information through deceptive means, such as posing as a prospective customer to extract confidential pricing details, or using a competitor's confidential materials obtained from a former employee of that competitor, is prohibited.

33. Data Backup and Business Continuity

33.1 Production Backup Policy

YEAB's production databases are backed up continuously with point-in-time recovery available for the past 35 days, and a full snapshot is additionally retained monthly for 12 months for compliance purposes. Backup restoration is tested quarterly by the Infrastructure team as part of YEAB's business continuity program, with results reported to the Security team.

33.2 Business Continuity Planning

Each department maintains a business continuity plan identifying critical functions and the minimum staffing or systems needed to sustain them during a disruption, such as a regional outage affecting one of YEAB's four offices. Plans are reviewed annually and are activated by the relevant VP in coordination with the incident commander process described in Section 6.4 when a disruption affects customer-facing systems.

34. Key Contacts Directory

34.1 Who to Contact

- **General HR questions:** people@yeabtech.com — see Chapter 4 (Leave), Chapter 9 (Compensation and Benefits).
- **IT support and equipment:** it@yeabtech.com — see Chapter 5 (IT and Security), Chapter 30 (New Hire Equipment).
- **Security incidents:** security@yeabtech.com or [#security-incidents](https://twitter.com/yeabtech) — see Section 5.4 and Section 23.1.
- **Data privacy and DSARs:** privacy@yeabtech.com — see Section 13.2.
- **Workplace concerns and Code of Conduct:** your manager, any People team member, or the ethics hotline at ethics.yeabtech.com — see Chapter 3 and Chapter 28.
- **Accommodations requests:** accommodations@yeabtech.com — see Section 11.3.
- **Press and media inquiries:** press@yeabtech.com — see Section 25.1.
- **Vendor and procurement questions:** procurement@yeabtech.com — see Chapter 22.

34.2 Office Addresses

- **Austin (HQ):** 400 Congress Avenue, Austin, TX 78701
- **Toronto:** 130 King Street West, Toronto, ON M5X 1E3
- **Lisbon:** Avenida da Liberdade 180, 1250-146 Lisboa
- **Bengaluru:** Prestige Tech Park, Marathahalli, Bengaluru 560103

35. Quick Reference: Key Numbers

35.1 Time Off

- PTO accrual, years 1-3: 1.75 days/month (21 days/year) — Section 4.1
- PTO accrual, year 4+: 2.1 days/month (25 days/year) — Section 4.1
- PTO carryover cap: 5 days — Section 4.1
- Sick leave: 10 days/year, does not carry over — Section 4.2
- Parental leave: 16 weeks, fully paid — Section 4.3
- Bereavement, immediate family: 10 days — Section 4.4
- Company holidays: 11 fixed + 2 floating — Section 4.5

35.2 Pay and Benefits

- 401(k) match: 100% of first 4%, immediate vesting — Section 9.3
- Equity vesting: 4 years, 1-year cliff — Section 9.4
- L&D; budget: \$1,500/year, pre-approval needed above \$500 — Section 9.5
- Home office stipend: \$500/year — Section 7.4
- Remote internet stipend: \$50/month — Section 7.4

35.3 Approvals and Thresholds

- Sales discount requiring Director approval: 10-25% — Section 12.2
- Sales discount requiring VP approval: above 25% — Section 12.2
- Deal Desk review required above: \$100,000 ACV — Section 12.1
- Gift disclosure threshold: above \$75 — Section 3.3
- Vendor security review required above: \$1,000/year — Section 22.1
- IC purchasing authority: up to \$500 — Section 22.2

36. Feedback on This Handbook

36.1 Suggesting Changes

Any employee can propose a change to this handbook, not only People Operations and Legal. Suggestions can be submitted through the "Handbook Feedback" form linked at the top of the internal wiki version of this document. Suggestions are triaged monthly by People Operations, and material policy changes are still routed through Legal for review before being adopted, following the same process described for the revisions listed in Appendix A.

36.3 Historical Context

This handbook has grown considerably since its first version, a 12-page document published when YEAB Technologies had 18 employees in a single Austin office. Many of the more detailed policies in this current version, including the incident severity classification in Section 6.4 and the regional variations in Appendix B, were added as the company expanded internationally and as engineering and compliance practices matured, rather than existing from the company's earliest days.

36.2 Annual All-Hands Review

A summary of the most significant handbook changes from the prior year is presented at YEAB's January all-hands meeting, giving employees a chance to ask questions directly to People Operations and Legal leaders before the updated version, referenced by the version number described in Appendix A, becomes fully effective.

37. Internal Mobility and Referrals

37.1 Internal Transfers

Employees become eligible to apply for an internal transfer after 12 months in their current role, though exceptions can be granted by agreement between the current and prospective manager. Internal candidates are guaranteed a first-round conversation for any role they apply to, and current managers are expected to support a transfer request rather than block it, consistent with YEAB's stated preference for internal mobility over external attrition.

37.2 Employee Referral Bonuses

Employees who refer a candidate who is hired receive a referral bonus of \$3,000 for most roles, paid after the new hire completes 90 days of employment, and \$5,000 for hard-to-fill senior engineering and sales leadership roles as designated by Talent Acquisition. Referral bonuses are paid regardless of the referring employee's department, provided they are not a member of the hiring panel for that specific role.

Appendix A: Policy Version History

A.1 Recent Revisions

This handbook is reviewed at least annually by People Operations and Legal, with interim updates made as needed when a specific policy changes. Employees are notified of material changes via the #company-updates Slack channel and by email.

- **Version 4.2 (January 2026):** Updated MFA requirements in Section 5.1 to prohibit SMS-based MFA for production systems.
- **Version 4.1 (September 2025):** Increased the annual learning and development budget described in Section 9.5 from \$1,200 to \$1,500.
- **Version 4.0 (March 2025):** Introduced the four-tier incident severity classification described in Section 6.4, replacing the previous three-tier system.
- **Version 3.6 (October 2024):** Extended parental leave described in Section 4.3 from 12 weeks to 16 weeks for all parents.
- **Version 3.5 (June 2024):** Added the Working from Abroad policy described in Section 10.3.

A.2 Questions About This Handbook

This handbook is not an employment contract and does not alter the at-will nature of employment where applicable under local law. Questions about any policy in this handbook should be directed to People Operations at people@yeabtech.com. In case of conflict between this handbook and local law in an employee's jurisdiction, local law governs.
